THE PROBLEM

BKC concentrates ~200,000 daily commuters within 3.7 km² peninsula, with **poor connectivity**. Three transit anchors — Bandra (Western Line), Kurla (Central / Harbour), and the new BKC Metro on Line 3 — sit just outside. The last 1.5 km to office spaces is driven by car or cab, congesting BKC's internal roads every weekday.

THE PROPOSAL

Deploy **patent-pending Road-Wagons** (12 m BEV, 1+6 doors, 92 pax) **as a BRT**, total 14 across two complementary services on existing BKC roads. Setup: modular 1.1 m raised platforms — installed overnight, No dedicated corridor. Dwell time ~ 30 sec /stop (same as metro). Speed ~ 1min / 1km congestion-free.

TRANSFORMATION VISION

Two route options, one fleet — R1 across perimeter loop, R2 spine connecting stations.

ROUTE OPTIONS

MINI-PILOT

Lowest-risk proof point: Kurla Stn ↔ BKC Telephone Exchange.

- Length: ~1.2 km · 2 platform stops
- Fleet: 2 Road-Wagons, 2 platforms
- > **1,000 vehicles/day off BKC roads**
- Conditional on lane priority on this corridor

Smallest viable footprint to validate boarding-rate & modal-shift assumptions.

entry option

R1 — PERIMETER LOOP

Continuous circulator hitting every office cluster on BKC's outer ring.

- Length: ~4.4 km · 10 platform stops
- Round-trip cycle: ~9 min
- Headway: 90 s (6 buses on route)
- Throughput: ~3,700 pphpd**

Best for: intra-BKC circulation & peak-hour office distribution.

R2 — SPINE

Shuttle linking BKC Metro ↔ Bandra ↔ Kurla ↔ E. Express Hwy.

- ~5.4 km one-way · 10 platform stops
- One-way 12 min · Round-trip 24 min
- Headway ~3 min (8 buses) · **~1,840 pphpd**

Extendability: double platforms unlock 96 Road-Wagons on R2 — **~22,000 pphpd**, matching today's average BKC footfall.

THE VEHICLE

D1 stepped D2 – D4 platform-level doors (mirrored on offside as D5 – D7)

PILOT IMPACT

90 days

Deploy first 6 buses + 8 platforms

~₹40 cr

Pilot capex (vs ₹2,500 cr / metro km)

3,700

pphpd per route at 90 s headway

~10,000

Private trips / day off BKC roads

90-DAY PILOT ROLLOUT

Days 1–22 · Survey & approvals

23–50 · Platforms + 6 buses

51–80 · Phased revenue service

81–90 · Measure
